**Kelly Cooper Commits to Supporting Inventors and Patent Reform**

**Chandler, Ariz., May 27, 2022--** [Kelly Cooper](#), Republican candidate for Arizona's 4th Congressional District has issued the following statement in support of the inventor community and United States Patent System:

*As a small business owner, I whole-heartedly support the community of inventors. Small inventors often pour their life's savings into their research. Most experiments fail but inventors carry on, sometimes for decades. When researchers finally achieve their eureka moment, they pursue patent protection. Inventors play by the rules set forth by the USPTO. They pay their fees, pay their lawyers and address concerns raised by patent examiners.*

*When patents are finally issued, they should be presumed valid and should be enforceable. Unfortunately, the patent system has been rigged against the small inventor. The Patent Trial and Appeal Board has become an inexpensive forum for large infringers to invalidate patents. Injunctions, an important tool in deflecting infringers, are extremely difficult for small inventors to obtain.*

*If elected, I will be a sponsor to Thomas Massie's - Restoring America's Leadership in Innovation Act – HR 5874. HR 5874 will eliminate the PTAB, restoring justice to American inventors, who are responsible for much of the advancements that enhance the quality of life everywhere.*
