

Dear USI constituents, thank you for your support.

Feel free to use the call script below and use it as a guideline, make it your own, to call your Legislators and let them know about your concerns.

"Hello, my name is _____ and I am a constituent living in {City, State}. I am a(n) {inventor, entrepreneur, small business owner, concerned citizen}. I am worried about the current state of our patent system. The 2006 eBay vs MercExchange decision, the America Invents Act of 2011 (AIA), and 2014 Alice vs CLS Banks Supreme court decision have significantly damaged our patent system. Currently, large corporations and competing countries like China are using our broken patent system to wipe out small inventors, harm our economy, and threaten our national security.

During the 117th Congress, HR 5874, The Restoring America's Leadership in Innovation (RALIA) act was introduced. This bill would have fixed the broken patent system, restoring our innovation engine to what it was, supporting small business owners and inventors.

I ask that you consider supporting and introducing this bill again in the 118th Congress. Please help fix our innovation system and save inventors and startups."

Thank you for your support,

The US Inventor Team.
